

Ref.: 383305

U·net central processing unit.

U·net is the key NEX·U·® component. It is the central processing unit that controls the system communications and houses the U•track software included. U·net includes a powerful 2.4 GHz processor and 4 GB RAM. It controls the system functions and it manages the wired and wireless communication between the NEX·U·® components. SAMOA may deploy a dedicated network with an additional Wi-Fi® router (U·net is not a router), contact SAMOA for further information. Instruction book: 838864.
